

KARTIK R AVAGHAN

Java Full Stack Developer | Spring Boot • REST APIs • React.js
Bengaluru • +91 7349524086 • avaghankartik@gmail.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with **1+ year** of experience building scalable web applications using Java, Spring Boot, React.js, MySQL, and RESTful APIs. **Strong expertise in backend development using Spring Boot, RESTful API design, Spring Security, JWT Authentication, Role-Based Access Control (RBAC), JPA/Hibernate, and MySQL database design.** Experienced in integrating React.js frontends with backend services and delivering end-to-end application features. Familiar with Microservices, Docker, Kubernetes, CI/CD pipelines, and Flutter application development.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, JPA/Hibernate, RESTful APIs, Microservices

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Database: MySQL

Security: JWT Authentication, OAuth2, Role-Based Access Control (RBAC)

DevOps & Tools: Docker, Kubernetes (Basics), Jenkins (Basic), Git, GitHub, Postman

Mobile: Flutter (Basics) — cross-platform Android/iOS app development

WORK EXPERIENCE

Thincnext – Software Developer

July 2025 - Present

- Developed end-to-end full-stack features using Java, Spring Boot, React.js, and MySQL, primarily contributing to backend development, REST API implementation, and business logic.
- Designed and implemented secure **REST APIs, JWT Authentication, and RBAC** for enterprise applications.
- Developed **React.js** frontend modules, integrating REST APIs and managing application state with **Redux Toolkit**.
- Resolved production issues through debugging, log analysis, and defect fixes across backend and frontend applications.
- Improved application performance by optimizing APIs, database queries, and resolving performance bottlenecks.

KEY PROJECTS

Company Projects

Reride – Vehicle Management & Tracking Platform | Spring Boot, React.JS, Redux Toolkit, MySQL

- Developed backend modules for vehicle management, including creation, publishing, and CRUD operations, while optimizing data handling and API performance
- Built an admin dashboard to manage vehicle inventories, pricing, and listing publication, with RBAC-secured staff/user management
- Integrated frontend and backend to ensure seamless data flow and a consistent user experience

KFCC – Film Chamber Workflow Management System | Spring Boot, React.JS, Redux Toolkit

- Developed dynamic role-based dashboards for a multi-level workflow management system with concurrent, role-specific approval processes
- Integrated frontend modules with backend REST APIs built reusable components with form validation and optimized state management

Academic Projects

PG Management System | Java, Spring Boot, React.JS, MySQL, Docker

- Built a full-stack PG management system with JWT authentication, RBAC, room allocation, complaint management, and CRUD operations
- Implemented a Payment Microservice with payment gateway integration and containerized deployment using Docker

AI Chatbot using Spring AI & Ollama (LLM) | Java, Spring Boot, Spring AI, React.JS

- Developed an AI-powered chatbot integrating Spring AI with Ollama LLM for real-time responses & streaming
- Built scalable REST APIs with Spring Boot and a React.js frontend for efficient prompt handling and seamless chat experience

EDUCATION

Bachelor of Engineering (B.E) – Electronics & Communication Engineering

2021 - 2025

STJIT College of Engineering (VTU), Ranebennur | CGPA: 8.8
