FULL STACK DEVELOPER

Full Stack Java Developer with nearly 1 year of hands-on experience in building and maintaining web applications using **Spring Boot, React.js, and RESTful APIs**. Skilled in implementing secure authentication using **JWT and role-based access control**, and managing application state with **Redux Toolkit**. Strong in **debugging, log analysis, and troubleshooting production issues**, with a focus on improving performance and reliability. Familiar with **Docker, CI/CD pipelines, and microservices architecture**, and passionate about building scalable applications and learning modern technologies.

TECHNICAL SKILLS

Backend: Java, Spring Boot

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Database: MySQL, PostgreSQL

Technologies: RESTful APIs, Microservices, JWT Authentication, OAuth2, Redux Toolkit

DevOps & Tools: Docker, Kubernetes (Basics), Jenkins (Basic), Git, GitHub

Other Skills: Debugging, Log Analysis, API Testing (Postman)

WORK EXPERIENCE

Software Developer | Thincnext

July 2025 – Present

- Developed and maintained applications using **React.js and Spring Boot**.
- Designed and implemented **RESTful APIs** with optimized performance and efficient data handling.
- Implemented **JWT-based authentication and role-based access control (RBAC)** to secure application routes and user access.
- Managed frontend state using **Redux (Redux Toolkit)** to ensure predictable and scalable state management.
- Performed **debugging, issue resolution, and log analysis** to resolve production issues and improve system reliability.
- Improved application performance by identifying and resolving **API bottlenecks and latency issues**.

KEY PROJECTS

Vehicle Management & Tracking Platform | *Spring Boot, React.js, REST APIs, JWT, Redux Toolkit, MySQL*

- Developed backend modules for vehicle management with real-time tracking and optimized CRUD operations.
- Built admin dashboard in React.js for inspection workflows, listing management, and role-based controls.
- Implemented secure RBAC for route protection across user and admin modules.
- Integrated frontend and backend to ensure seamless data flow and consistent user experience.

Film Chamber Workflow Management System | *React.js, Redux Toolkit, REST API Integration, Tailwind CSS*

- Developed a modular, responsive frontend using React.js for a multi-level workflow system.
- Implemented role-based approval workflows and dynamic dashboards based on user permissions.
- Managed global session state using Redux Toolkit for authentication and access control.
- Built reusable components to handle complex state transitions and concurrent approval processes.
- Enhanced UX with form validation, optimized state management, and seamless API integration.

PG-Management System | *Java, Spring Boot, ReactJS, MySQL*

- Developed a full-stack PG Management System with JWT-based authentication and role-based access. Implemented a separate Payment Microservice with payment gateway integration for secure transactions and used Docker for deployment. Built key features including room allocation, complaint management, and complete CRUD operations.

AI Chatbot using Spring AI & Ollama (LLM) | *Java, Spring Boot, Spring AI, ReactJS*

- Developed an AI-powered chatbot using Spring AI integrated with the Ollama LLM for real-time conversational responses. Built scalable REST APIs with Spring Boot and integrated a React.js frontend, enabling efficient prompt handling and response streaming.

EDUCATION

Bachelor of Engineering (BE) – Electronics & Communication Engineering
STJIT College of Engineering (VTU) – Ranebennur

2021 – 2025

- CGPA: **8.8**
